## HARDWOOD FLOOR GRADING BASICS:

### CLEAR

Practically free of defects, made up mostly of heartwood. Most uniform color with limited small character marks.

### SELECT or 1<sup>ST</sup> GRADE

Almost clear, with more of the normal characteristics such as knots and color variations.

Unlimited sound sap wood (lighter in color).

### #1 COMMON or 2<sup>ND</sup> GRADE

More markings than clear or select. Light and dark colors, knots and other character marks, including sticker stain, provide a variegated appearance. Often the common grades are selected because of their natural, rustic appearance.

### #2 COMMON or 3<sup>RD</sup> GRADE

The most knots, imperfections, including sticker stain, and color variations. A natural looking, economical floor after knot holes, checks and other imperfections are filled and finished.
